NOTICE

Bear Lake Tri-Annual Drawdown

Bear Lake Protection and Rehabilitation District is required to remove all the boards on the Bear Creek Dam every three years as part of the operating agreement with the State of Wisconsin. This required action will take place on or about September 30, 2026, and will remain open until on or about April 1, 2027. Due to the lower than normal lake level we are currently experiencing the lake level may not drop any further when the boards are removed. Please make any necessary adjustments for your boats or pier removal as needed.

Thank you for your understanding.

Questions may be directed to any Commissioner - find email addresses on our website: bearlakeprd.org
